Research Papers

Geologic controls on the formation and distribution of gas in British Coal Measure strata
D.P. Creedy (Burton-on-Trent, U.K.) 1
Correlation of yields of pyrolysis products and rank of Styrian lignites and subbituminous coals
J.K. Fink and M. Vinzenz (Leoben, Austria) 33
Estimation of relative depth of burial using vitrinite reflectance: implications for a sedimentary basin formation by basement tilting
A. Yamaji and M. Takahashi (Sendai, Japan) 41
The effect of depositional environment on coal distribution and quality parameters in a portion of the Highveld Coalfield, South Africa
H.H.B. Hagelskamp, P.G. Eriksson and C.P. Snyman (Hillcrest, R.S.A.) 51
Coal rank variation in the Intrasudetic Basin, SW Poland
M. Mastalerz (Wroclaw, Poland) and J.M. Jones (Newcastle upon Tyne) 79
A statistical approach to the study of the distribution of trace elements and their organic/inorganic affinity in Lower Gondwana coals of India
K.N. Mukherjee and N.R. Dutta (Calcutta, India), D. Chandra and H.S. Pandalai (Dhanbad, India), and M.P. Singh (Varanasi, India) 99
Petrographic zonation within the Pittsburgh coal
J.J. Renton (Morgantown, WV, U.S.A.) and D. Scott Bird (New Orleans, LA, U.S.A.) ... 109
The vertical distribution of minerals in coal zones A, B, C, D, Hat Creek, British Columbia
P.A. Hill (Cork, Ireland) 141
Tonsteins of Hat Creek, British Columbia: a preliminary study
P.A. Hill (Cork, Ireland) 155
Preliminary mineralogical investigation of Leicestershire low-rank coal
B.A. Cressey (Whiteknights, U.K.) and G. Cressey (Oxford, U.K.) 177
The Elbistan lignite field
A.R. Doğru (Istanbul, Turkey), A.F. Gaines (London, U.K.), N.S. Gökçen (Balçali, Turkey), S.L. Gökçen (Konak, Turkey) and M. Wolf (Aachen, F.R.G.) 193
Paleoecology of Middle Pennsylvanian-age peat-swamp plants in Herrin coal, Kentucky, U.S.A.
R.B. Winston (Tuscaloosa, AL, U.S.A.) 203
Vegetational history of the Springfield Coal (Middle Pennsylvanian of Illinois) and distribution patterns of a tree-fern miospore, *Thymospora pseudothiessenii*, based on miospore profiles
J.M. Mahaffy (Sioux Center, IA, U.S.A.) 239
Petrographic zonation within the Waynesburg coal
J.J. Renton and W.M. Hamilton (Morgantown, WV, U.S.A.) 261
A case study on the apparent absence of thermal effects of an andesitic intrusion on the rank of adjacent coal
R.D. Merritt and M.D. Albanese (Fairbanks, AK, U.S.A.) 275
Petrographic characteristics of the solid fuels of India with particular reference to the coking coals
H.S. Pareek (Faridabad, India) 285

Petrography and depositional conditions of the 64/65 coal seam in the Intrasudetic Basin, SW Poland
M. Mastalerz (Wroclaw, Poland) and M. Smyth (North Ryde, N.S.W., Australia) 309
Depositional setting and geometric structure of the Beypazarı lignite deposits, Central Anatolia, Turkey
F. Yağmurlu (Isparta, Turkey), C. Helvaci and U. Inci (Izmir, Turkey) 337
The coal deposit of Tibita, Colombia — Geologic and coal petrographic investigation
W. Hiltmann and H. Korn (Hannover, F.R. Germany) 361
Effect of maceral subtypes and mineral matrix on measured reflectance of subbituminous coals and dispersed organic matter
F. Goodarzi (Calgary, Alta., Canada), T. Gentzis (Newcastle-upon-Tyne, Great Britain), S. Feinstein (Negev, Israel) and L. Snowdon (Calgary, Alta., Canada) 383
The relationship between macerals and sulphur content of some South African Permian coals
D.L. Roberts (Pretoria, South Africa) 399
